Profile

Senior Technical Artist with over 10 years of experience in the iGaming industry. Experienced in asset integration, pipeline optimization, automation, and collaboration with programmers and artists. Skilled in Adobe Animate, Photoshop, Spine, Neutrino Particles, and process improvement to deliver optimized game assets efficiently.

Employment

Senior Technical Artist

2014 - Dec 2021

Playtika

- Working in Adobe Animate - Creating asset structures and integrating them into the game engine. Optimizing assets, creating 2D animations, working with text fields, preparing and implementing sounds in the structure, preparing scenes for different resolutions (4x3, 3x2, 16x9). Working in
- Photoshop - Preparing and optimizing graphical assets (cutting, compositing, optimization, and asset organization).
- After Effects - Converting video into frame-by-frame animations.
- Working in Audition - Optimizing audio, splitting tracks, and combining multiple audio files into production-ready assets.
- Scrum and Kanban agile development models.

Freelance

Feb 2022 - Sep 2024

Senior Technical Artist

Sep 2024 - Present

Playtika (Slot Central Department), Vinnytsia

- Creating resource structures for the game engine and handing them over to the programmer
- Collaborating closely with programmers, animators, and artists.
- Optimising resources – batches, atlases, masks, number of objects
- Working with Spine – checking resources against metrics(meshe, constraints, polygons), identifying gaps in effects (Blending), exporting and integrating JSON. Creating simple animations – low icons, anticipation, background.
- Neutrino Particles – Creating and integrating particle effects, including WinLine effects, background particles, and pop-up animations.
- Working with Photoshop, preparing graphical assets for integration, and developing simple Photoshop scripts to automate production workflows.
